IBM PBEL Cloud Computing

ROADMAP GENERATOR

THE ROADMAP GENERATOR IS A WEB-BASED APPLICATION THAT HELPS USERS CREATE PERSONALIZED LEARNING PATHS FOR VARIOUS CAREER FIELDS SUCH AS WEB DEVELOPMENT, DATA SCIENCE, MACHINE LEARNING, CYBERSECURITY, AND UI/UX DESIGN. USERS SELECT THEIR DESIRED CAREER, EXPERIENCE LEVEL, AND LEARNING DURATION, AND THE SYSTEM DYNAMICALLY GENERATES A STRUCTURED, STEP-BY-STEP ROADMAP. THE PLATFORM ALSO INTEGRATES AN AI CHATBOT POWERED BY IBM WATSONX ASSISTANT TO GUIDE USERS, ANSWER QUESTIONS, AND ENHANCE INTERACTION. BUILT USING HTML, CSS, AND JAVASCRIPT, THE PROJECT FOCUSES ON SIMPLIFYING CAREER PLANNING THROUGH AN INTERACTIVE AND USER-FRIENDLY INTERFACE.

WHAT IS WATSON-X ?

IBM's *Watson-x AI* is an enterprise-grade artificial intelligence platform designed to help businesses build, train, deploy, and manage AI applications at scale. It's part of the broader **IBM Watson-x** portfolio – a set of AI and data tools for large-scale, trusted AI in business environments

INTENTS

Intent = User's goal or purpose

An intent represents **what the user wants to do**.

Example:

If a user says:

"Generate roadmap"

"I want a web development plan"

"Create learning path

Create intent +

Intents (7)	Description	Modified	Examples
#about_support	About page questions	an hour ago	3
#Career-selection	user selects specific career	an hour ago	5
#download-roadmap	Download roadmap	an hour ago	4
#Generate-Roadmap	Give roadmaps	an hour ago	5
#Greetings	Greet the user	an hour ago	6
#progress-tracking	Ask about tracking progress	an hour ago	3
#Roadmap-duration	ask about time required	an hour ago	3

ENTITY

Entity = Important keyword inside the sentence

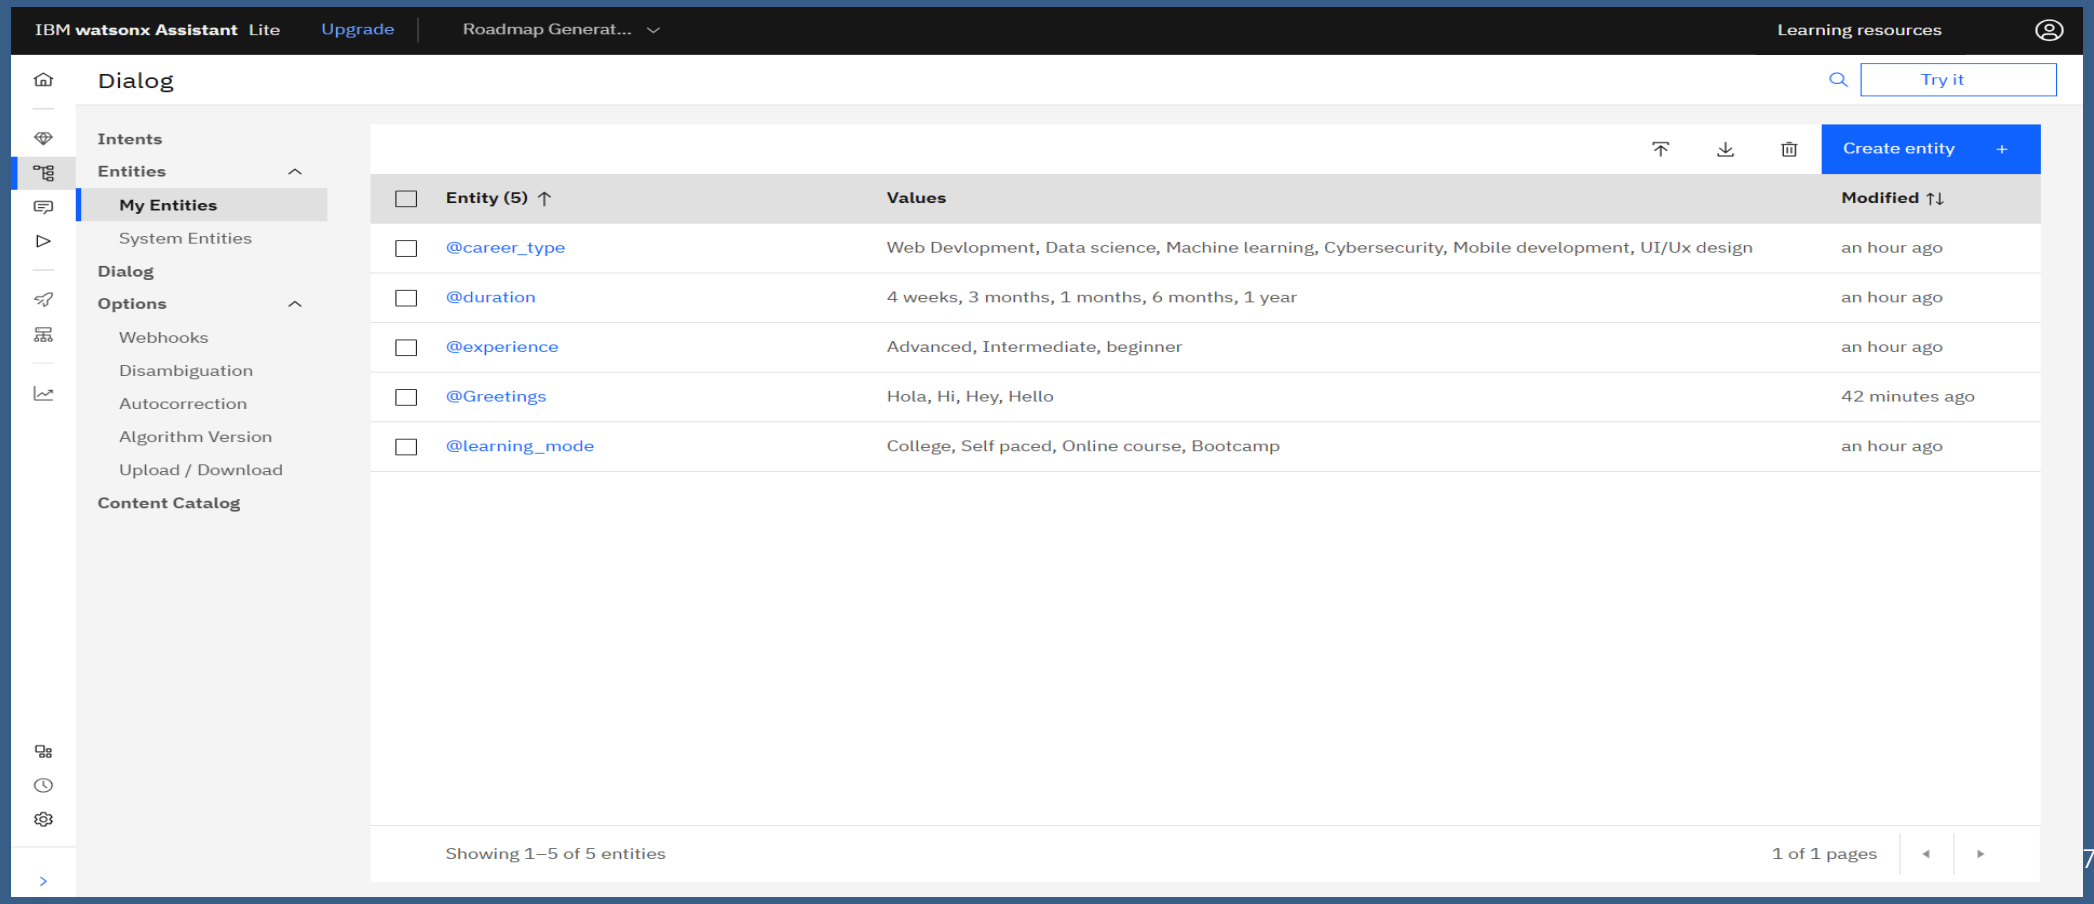
Entities extract **specific information** from user input.

Example:

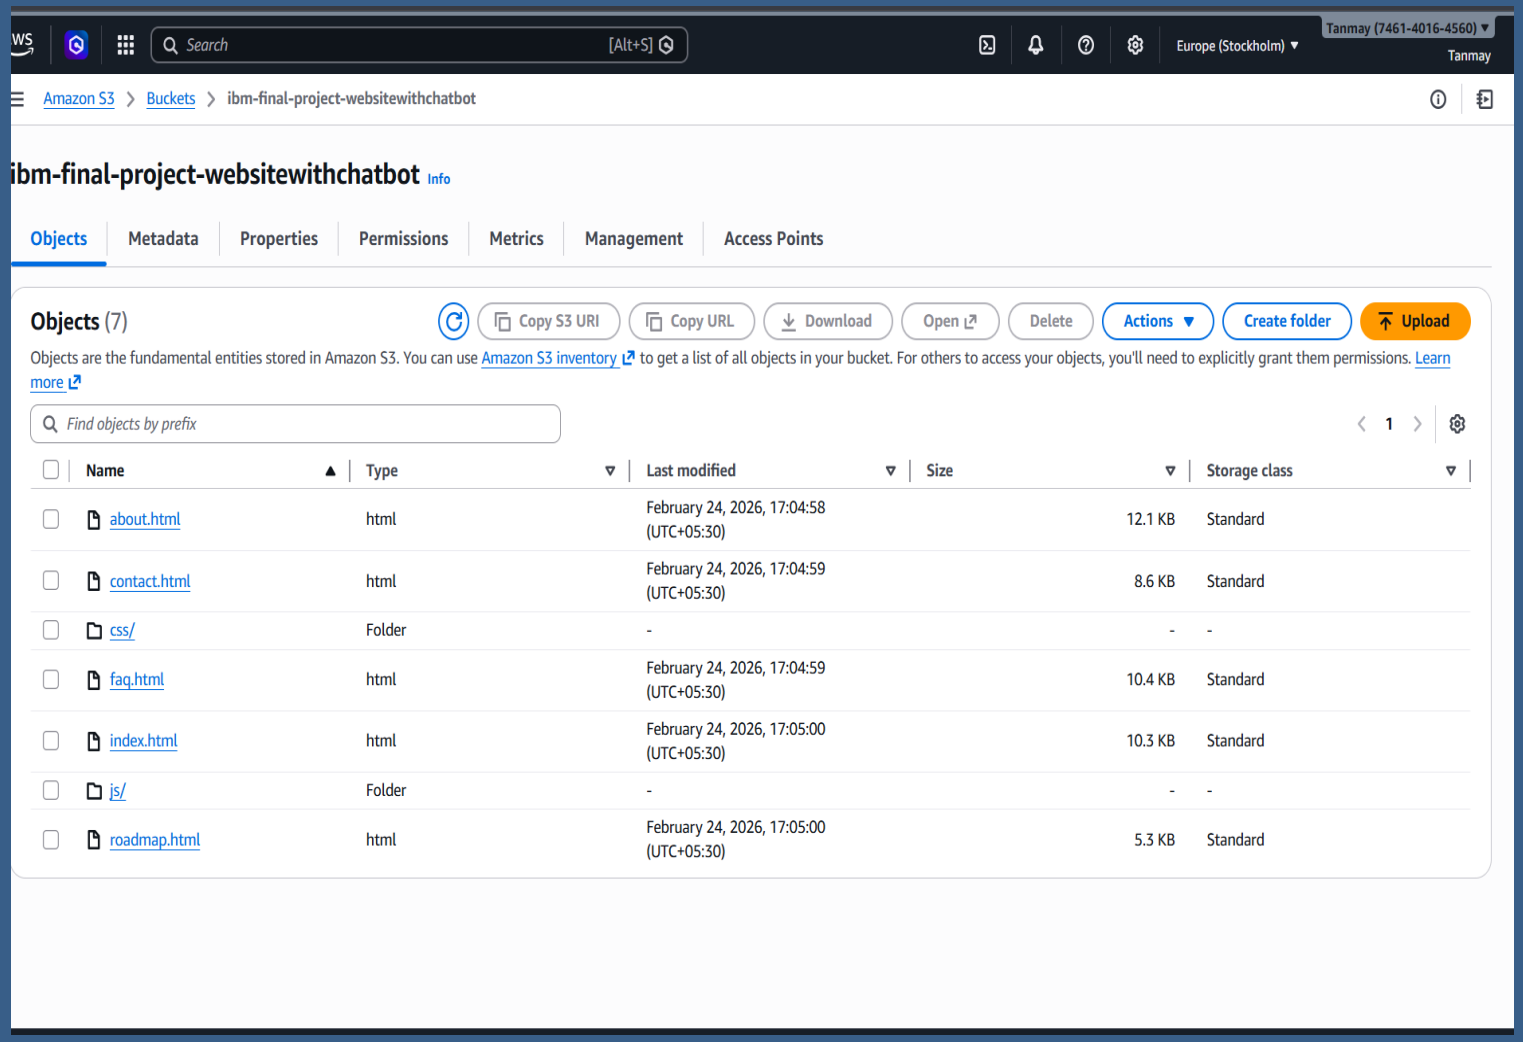
User says:

“Create roadmap for data science”

MY PROJECT ENTITES



AWS S3 DEPLOYMENT



I have successfully deployed my Roadmap Generator website using Amazon Web Services S3 (Simple Storage Service). The static web application, built with HTML, CSS, and JavaScript, is hosted securely and efficiently on an S3 bucket configured for static website hosting. This deployment ensures high availability, scalability, and fast content delivery, allowing users to access the platform seamlessly from anywhere.
